

Intellectual Property and the Biosciences

White Rose IPBio symposium

7 July 2010

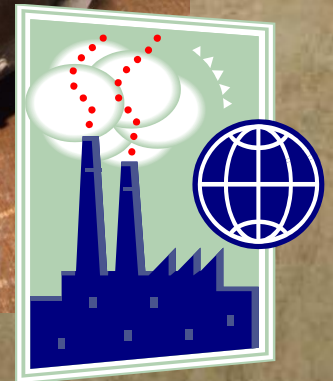

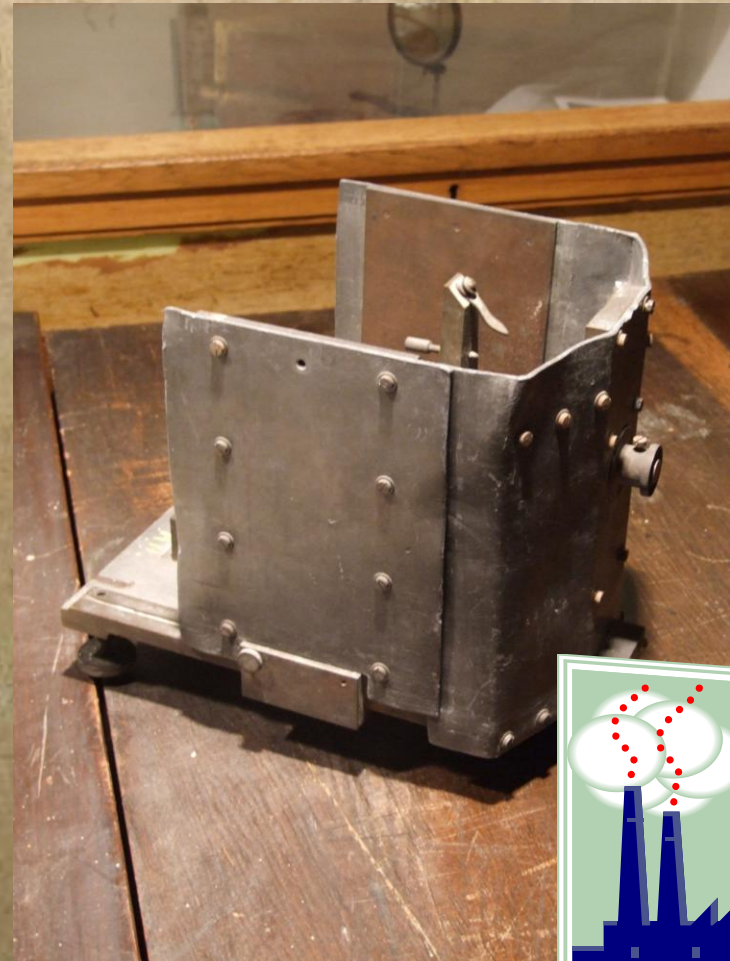

University of Leeds

Greg Radick

Leeds Bureau of Bio-Technology

William Astbury's "molecular biology"

Three themes

- (1) The modern biosciences have never been pure.
- (2) Technically innovative biosciences are often disciplinarily innovative.
- (3) Wider perspectives can yield instructive surprises.

The White Rose IPBio Project

White Rose
university consortium

Universities of Leeds, Sheffield & York

The IPBio Network

Arts & Humanities
Research Council

Format

Today: symposium (8 talks, wrap-up)

Tomorrow: summer school (3 papers,
future planning)
